DESCRIBING ACTIVITIES IN THE PAST

UNIT 5 | CYCLE 3

IN THIS UNIT, YOU WILL LEARN ABOUT:

1. Past simple (review).
2. Past continuous.
3. While and When.

LET'S TALK

Choose one of the questions from the spinning wheel to decide a choice.

PROGRAMMING PARADIGMS

What are paradigms in programming?
LET'S TALK!

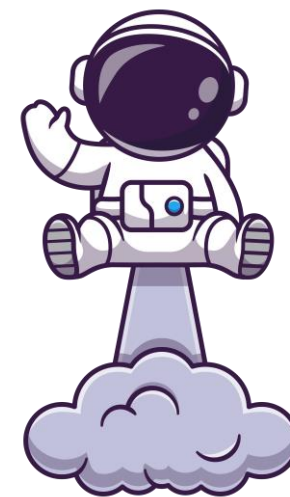

DID YOU KNOW THAT...?

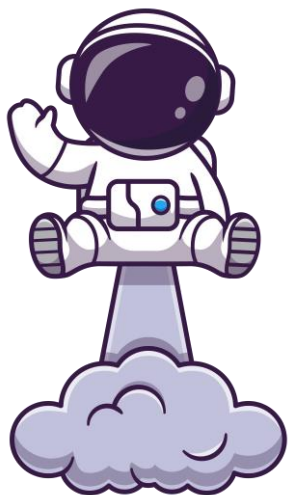

A paradigm is a thought or model that has **distinct features**, frameworks, patterns, and style which help you solve a particular problem.

DID YOU KNOW THAT...?

In the field of computer science, **new** programming languages **emerge from existing languages** and add, remove and combine features in a new way.

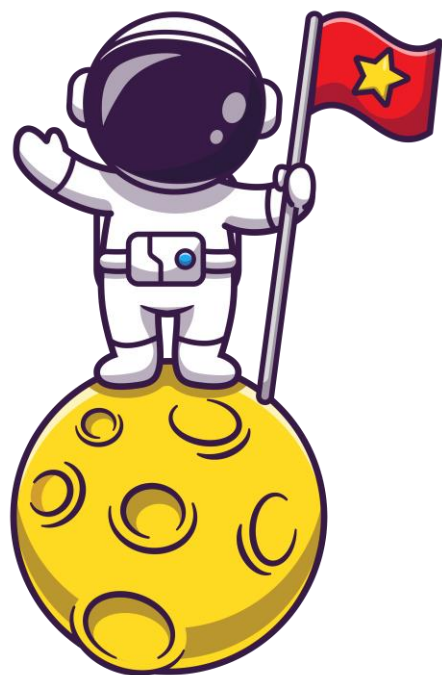

DID YOU KNOW THAT...?

In the field of computer science, **new** programming languages **emerge from existing languages** and add, remove and combine features in a new way.

DID YOU KNOW THAT...?

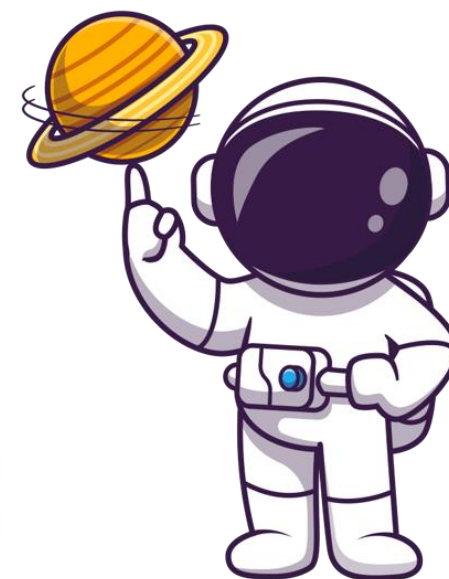

The languages may follow a particular paradigm or can be a **combination** of many paradigms.

DID YOU KNOW THAT...?

There are over **300** programming languages, but you don't need to know them all, and you'll find that each language serves a specific purpose.

READING

WHICH WAS THE FIRST PROGRAMMING LANGUAGE?

Even though there's not a definite answer, **Plankalkül**, pronounced "**Plan Calculus**", is regarded as the world's first high-level programming language for computers. Created by German engineer Konrad Zuse between 1942 and 1945, the language didn't receive much attention. The popular languages that followed Plankalkül were Fortran and Lisp.

LEARN TO < CODE >

Here's how to write Hello world! in Plankalkül, the world's first programming language for computers:

```
R1.1(V0[:sig]) => R0
```

```
R1.2(V0[:m x sig]) => R0
```

```
0 => i | m + 1 => j
```

```
[W [ i < j -> [ R1.1(V0[i: m x sig]) => R0 | i + 1 => i ] ] ] END
```

```
R1.3() => R0
```

```
'H';'e';'l';'l';'o';',';','w';'o';'r';'l';'d';'!' => Z0[: m x sig] R1.2(Z0) => R0
```

```
END
```

READING

WHICH WAS THE FIRST PROGRAMMING LANGUAGE?

In 1972, Plankalkül was comprehensively published and implemented in a dissertation. Later in 1998 and 2000, there were instances of other independent implementations.

Just in case you're wondering about the literal meaning of Plankalkül, it means "formal system (kalkül) for planning (plan)".

On the other hand, Fortran was the first widely-popular high-level programming languages. Lisp was another early language that was beaten by Fortran by a couple years.
