ACTIVITY #2

1. True or False activity.

1. True/False: Ambiguity in natural language understanding refers to sentences with a single, well-defined interpretation.

2. True/False: Lexical ambiguity involves words that can only have one meaning or assertion in any given context.

3. True/False: Syntactic ambiguity is related to the parsing of sentences in multiple syntactic forms.

4. True/False: Semantic ambiguity is primarily a concern for non-native speakers who need to rewire their brains to learn a new language.

5. True/False: Metonymy deals with phrases where the literal meaning aligns perfectly with the figurative assertion.
