1)Lesson 1: Keywords:

- Information Security: the state of being protected against the unauthorized use of information, especially electronic data, or the measures taken to achieve this.
- Incident response: the technical portion of incident management, which also includes executive, HR and legal management of a serious incident.
- Threat: a statement of an intention to inflict pain, injury, damage, or other hostile action on someone in retribution for something done or not done.
- Technological failure: when a technological product or system does not perform as intended, leading to operational disruptions, financial losses, or other significant impacts on an organization or individuals.
- Disruption: disturbance or problems which interrupt an event, activity, or process.
- Incident reporting: the process of capturing, recording, and managing an incident occurrence such as an injury, property damage, or security.
