UNIT 3

INTERVIEW FOR PROGRAMMERS AND BEST PRACTICES IN PROGRAMMING

1. General objectives

- Identify a foundational set of specific vocabulary related to programming interviews and best practices in programming.
- Develop the capacity to extract key information and understand fundamental concepts from written materials.
- Apply programming vocabulary in relevant contexts.

SKILLS TO BE DEVELOPED

- Linguistic competence: Recognize and understand basic vocabulary, concepts and phrases related to the best practices in programming.
- Pragmatic competence: Comprehend basic written descriptions through reading.
- Sociolinguistic competence: Contextualize vocabulary within real-world scenarios, enhancing abilities to relate linguistic forms to their practical uses in the field.
- Topical Competence: Read and understand texts related to contemporary topics in programming, such as recent innovations in the field.
