

## ACTIVIDAD

### True/False questions about the previous reading.

Se alcanza la aprobación con el 70%

Based on the reading, answer the following questions:

1. Design patterns can be directly copied into a program as specific pieces of code.

TRUE

FALSE

2. Design patterns are often confused with algorithms because they both provide solutions to known problems.

TRUE

FALSE

3. The structure of classes section in a pattern description illustrates the order of code implementation.

TRUE

FALSE

4. Design patterns, like algorithms, always define a clear set of actions to achieve a specific goal.

TRUE

FALSE

5. The motivation section in a pattern description elaborates on the problem and the solution the pattern enables.

TRUE

FALSE
