

# Módulo 1

Review some  
vocabulary

## 1. Rawness:

The quality of being unprocessed or unfiltered, often used to describe the unedited nature of content.

## 2. Moderation:

The act of controlling or regulating something to ensure it meets certain standards or guidelines, especially in the context of managing online content.

## 3. Periscope:

A mobile streaming app owned by Twitter, allowing users to broadcast live video to their followers.

## 4. Flag

To notify a platform or moderator of inappropriate or harmful content, usually by clicking a designated button or reporting feature.

## 5. Viral:

Relating to the rapid spread or circulation of something, such as a video, image, or piece of information, often through social media or online platforms.

## 6. Live Streaming:

The broadcasting of real-time video or audio content over the internet, allowing viewers to watch events as they happen.

## 7.Automation:

The use of technology or machinery to perform tasks or processes with minimal human intervention, often used to expedite or streamline operations.
