ENGLISH CODE ARTIFICIAL INTELLIGENCE

EXPLORER- Module 1

Unit 5

TALENTO TECH

AZ | PROYECTOS EDUCATIVOS

UTP Universidad Tecnológica de Pereira

Contextualization of my learning

In this module, students delve into a multifaceted exploration of artificial intelligence (AI) that extends beyond the technical aspects. While covering the essentials of AI, the focus broadens to encompass global citizenship and the ethical considerations integral to AI development. A significant segment of the module is dedicated to refining reading and writing skills within the context of AI. Moreover, the scope extends to sustainable living, placing emphasis on environmental issues and eco-friendly practices. By examining the interconnectedness of AI with sustainable living, students gain insights into how technological advancements impact our ecological footprint.

General objective

UNIT 5

- Develop a comprehensive understanding of artificial intelligence (AI), covering fundamental concepts and extending into ethical considerations, global citizenship, and the impact of AI on various aspects of society.

SKILLS TO DEVELOP

- Linguistic competence.
- Pragmatic competence.
- Sociolinguistic competence.
- Topical Competence.

- **Linguistic Competence:** Acquire a specialized vocabulary related to artificial intelligence (AI) and sustainable living.
- **Pragmatic Competence:** Apply appropriate language structures and discourse patterns when discussing AI concepts, ethical considerations, and sustainable living.
- **Sociolinguistic Competence:** Analyze and discuss societal attitudes, values, and ethical perspectives related to AI, sustainable living, and global challenges.
- **Topical Competence:** Foster a holistic learning experience by integrating sustainable living principles, environmental awareness, and global challenges within the context of AI. Encourage critical thinking about ethical responsibilities, human rights, and positive contributions to global well-being through the lens of technological advancements.

Unit 5. Sustainable living

Execution time: 4 hours

APPROACH OF THE SESSION

1) Socialize the technology idiom of the day.

2) Explain what the scanning strategy is.

2) Hangman game: vocabulary about sustainable living.

3) Study the previous vocabulary.

4) Reading: "The urgency of sustainable living and why we can’t wait".

5) Matching heading activity about the previous reading.

6) Multiple-choice questions about "The urgency of sustainable living and why we can’t wait".

7) Discussion questions about sustainable living.

8) Watch the video "Sustainable Living: What Does It Mean?"

9) Multiple Choice questions about the previous reading

10) Complete the tasks from the video "Green is great". (British Council)
